

Note to User:

These mittens can be used to help instill recognition of a quantity without having to count the objects. The numbers in this set go along with the dots found on dice. A set of plain mitten cards can be found at the end of this document. Feel free to add whatever content you wish either on the mitten or on the side.

Remember to keep the material in your creep track simple so the focus stays on the movement and students are not stopping to decode the material.
